PROFILE

Versatile Software Developer with 5 years of experience in Python and C#, dedicated to enhancing collaborative work environments and driving customer satisfaction. I specialize in crafting both client-facing and backend applications, consistently delivering impactful results.

On the frontend, I leverage JavaScript, React, and Vue to build intuitive, reusable UI components that elevate web and mobile user experiences. My backend expertise spans C# .NET and Python, with a strong focus on Django for developing robust web applications.

I’m also skilled in harnessing SharePoint for seamless enterprise content management and collaboration, and I use Power Platform to create custom business solutions, automate workflows, and integrate data across diverse systems, boosting operational efficiency.

Work Experience

**Turing** United States

Oct 2024 - Present

Full Stack Engineer (LLM Trainer - Python and JavaScript)

- Conducted **side-by-side evaluations** of LLM outputs, ensuring responses aligned with real-world Python and JavaScript problem-solving scenarios.
